Summary

CS graduate building production-grade backend, ML, and data systems. Experience shipping end-to-end solutions across research, government labs, and hackathon environments. Seeking SWE, ML, or platform roles.

Education

University of California, Merced
Chancellor's Honor List (2022–2024)

Aug 2022 – May 2025 B.S. Computer Science and Engineering

Relevant coursework: Software Engineering, Databases, Computer Vision, Statistics, Linear Algebra

Technical Skills

Languages: Python, TypeScript, C++, R

Backend: FastAPI, Django, Flask, REST, WebSockets, Redis, PostgreSQL, MongoDB

ML / Data: PyTorch, TensorFlow, NumPy, Pandas, OpenCV, RAG, multimodal models

Infra: Docker, Linux, GitHub Actions, GPUs, HPC, Kubernetes (exp.)

Frontend: React, Next.js, Tailwind, Streamlit

Experience

IMPACT Intern — NNSA (LLNL)

Jun 2025 – Present

- Analyzed large-scale radiation datasets; optimized Python pipelines for performance and maintainability.
- Built Streamlit dashboards and tooling supporting database platform migration.

Undergraduate Research Assistant — IoT4Ag

Mar 2025 – May 2025

- Evaluated spatiotemporal data fusion algorithms for multi-source agricultural sensors.

Student Success Intern — UC Merced

Nov 2024 – May 2025

- Built Python data pipelines; implemented deduplication algorithms reducing redundancy by ~10%.
- Improved processing efficiency by ~30% via optimized data handling.

Software Engineering Micro-Intern — Utopia-PHP

Nov 2024 – Dec 2024

- Implemented PHPStan static analysis and automated CI via GitHub Actions.

Student Associate — Zscaler

Jul 2023 – Aug 2023

- Built Python automation for server monitoring and benchmark-based alerting.

Projects

ExoIdent — NASA Space Apps

- Built a multimodal ML system for exoplanet detection using Kepler and TESS data.
- Deployed distributed inference (FastAPI, Celery, Redis) achieving ~1000 preds/sec.

Golden Gate Quest — NVIDIA Spark

- Built a full-stack RAG system with GPU-accelerated vector search and real-time voice guidance.

BART Aerial Track Inspection

- Developed CV pipelines and Django app for automated rail inspection and reporting.

Leadership & Certifications

HackMerced — Director; ACM UC Merced — Secretary

DeepLearning.AI TensorFlow Developer; SDSC HPC Institute; Google GenAI; AWS SA (Forage)
